

Momentum X Trend Trading

Master the art of systematic momentum trading through proven technical frameworks, disciplined execution, and institutional-grade analysis techniques.

Course Overview

Your Journey to Trading Excellence

01

Foundations

Core momentum principles and institutional behavior

02

Technical Mastery

Chart reading and EMA systems

03

Stage Analysis

Market structure and trend identification

04

Systematic Approach

Quantitative filters and screening

05

Psychology & Risk

Discipline and emotional control

06

Real-World Application

Case studies and strategy development

07

Capstone Project

Build your complete trading blueprint

Module 1: Foundations of Momentum & Growth Trading

Core Principles

- Momentum and growth-style trading fundamentals
- Identifying high-performance stocks
- Understanding price-volume action dynamics

Institutional Behavior

- Recognizing accumulation patterns
- Spotting distribution signals
- Following smart money flows

Module 2: Chart Reading & EMA Importance

Exponential Moving Averages (EMAs) are critical tools for identifying trend strength and high-probability entry points.

12 EMA

Short-term momentum indicator for quick trend changes

60 EMA

Swing-trend validation and intermediate support

150 EMA

Intermediate trend strength confirmation

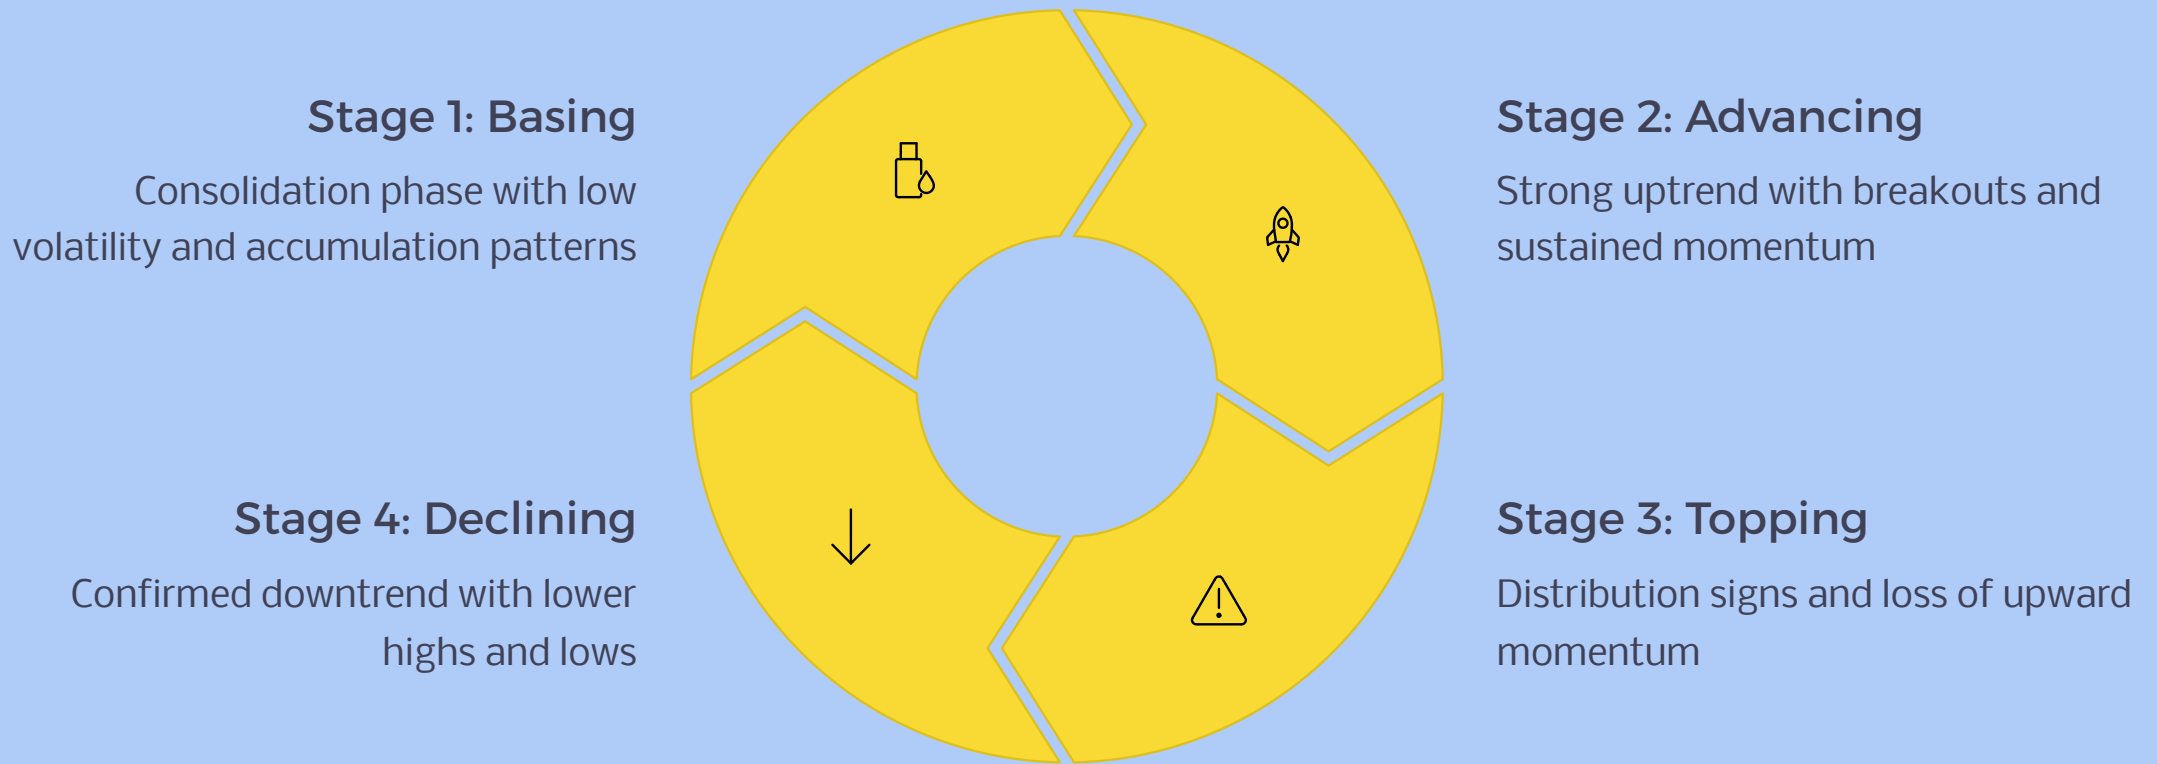

200 EMA

Long-term institutional trend filter and major support

EMA confluence creates high-probability setups when multiple timeframes align, signaling strong institutional support and trend continuation.

Module 3: Stage Analysis Framework

Understanding market structure through four distinct stages helps align trading decisions with prevailing trends.

Stage Transitions

Recognize Patterns

Identify characteristics of each stage

Spot Transitions

Detect shifts between stages early

Align Strategy

Match trades to stage context

Module 4: Quantitative Filters & Screening Systems

Build Systematic Universes

- Rule-based fundamental and technical filters
- Momentum and strength-based scoring models
- Trend template logic for consistency
- Systematic stock screening using EMAs and stages

Transform subjective analysis into objective, repeatable processes that identify high-probability opportunities.

Module 5: Psychology, Discipline & Risk Management

Trading Mindset

Develop systematic thinking required for consistent execution and long-term success

Emotional Control

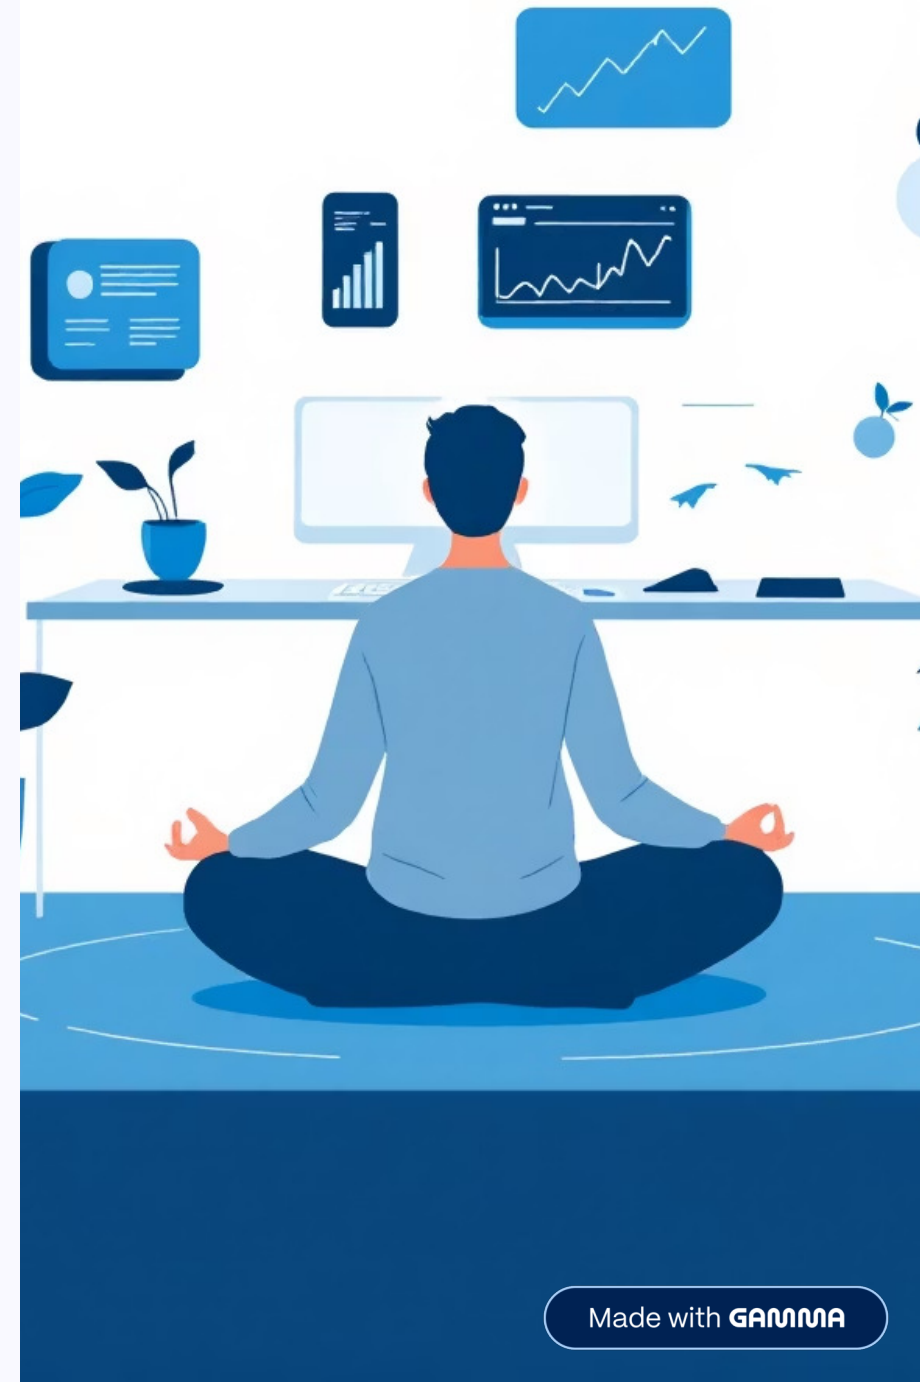

Handle fear, greed, hesitation, and overconfidence through structured frameworks

Rule-Based Discipline

Create and follow trading rules that remove emotion from decision-making

Risk Management

Master position sizing, risk control, and build emotional resilience for drawdowns

Module 6: Market Application & Case Studies

Historical Analysis

Study real charts using EMAs and stage frameworks

Live Screening

Generate trade ideas using systematic filters

Trade Journaling

Document and learn from every trade systematically

Research Reports

Create institutional-grade trade documentation

Module 7: Capstone Project

Apply everything you've learned to create your personalized momentum trading system.

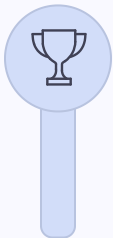

Strategy Development

Integrate EMA analysis and Stage Analysis into a complete rule-based trading strategy

Research Report

Prepare a structured, professional research report documenting your methodology

Trading Blueprint

Create your personalized momentum trading system ready for live market application
