

W.D. Gann Swing Structure & Square of 9 Framework

A professional price-time geometry program for serious traders seeking structured market analysis beyond indicators.

Program Overview

Fees

Rs. 1,50,000

Designed For

Professional & Serious
traders

Core Focus

Swing structure, Price Geometry, Time Balance

This program delivers a structured interpretation of W.D. Gann's work, teaching the Square of 9 as a mathematical framework—never for prediction. All analysis anchors to swing structure, confirmation, and disciplined risk control.

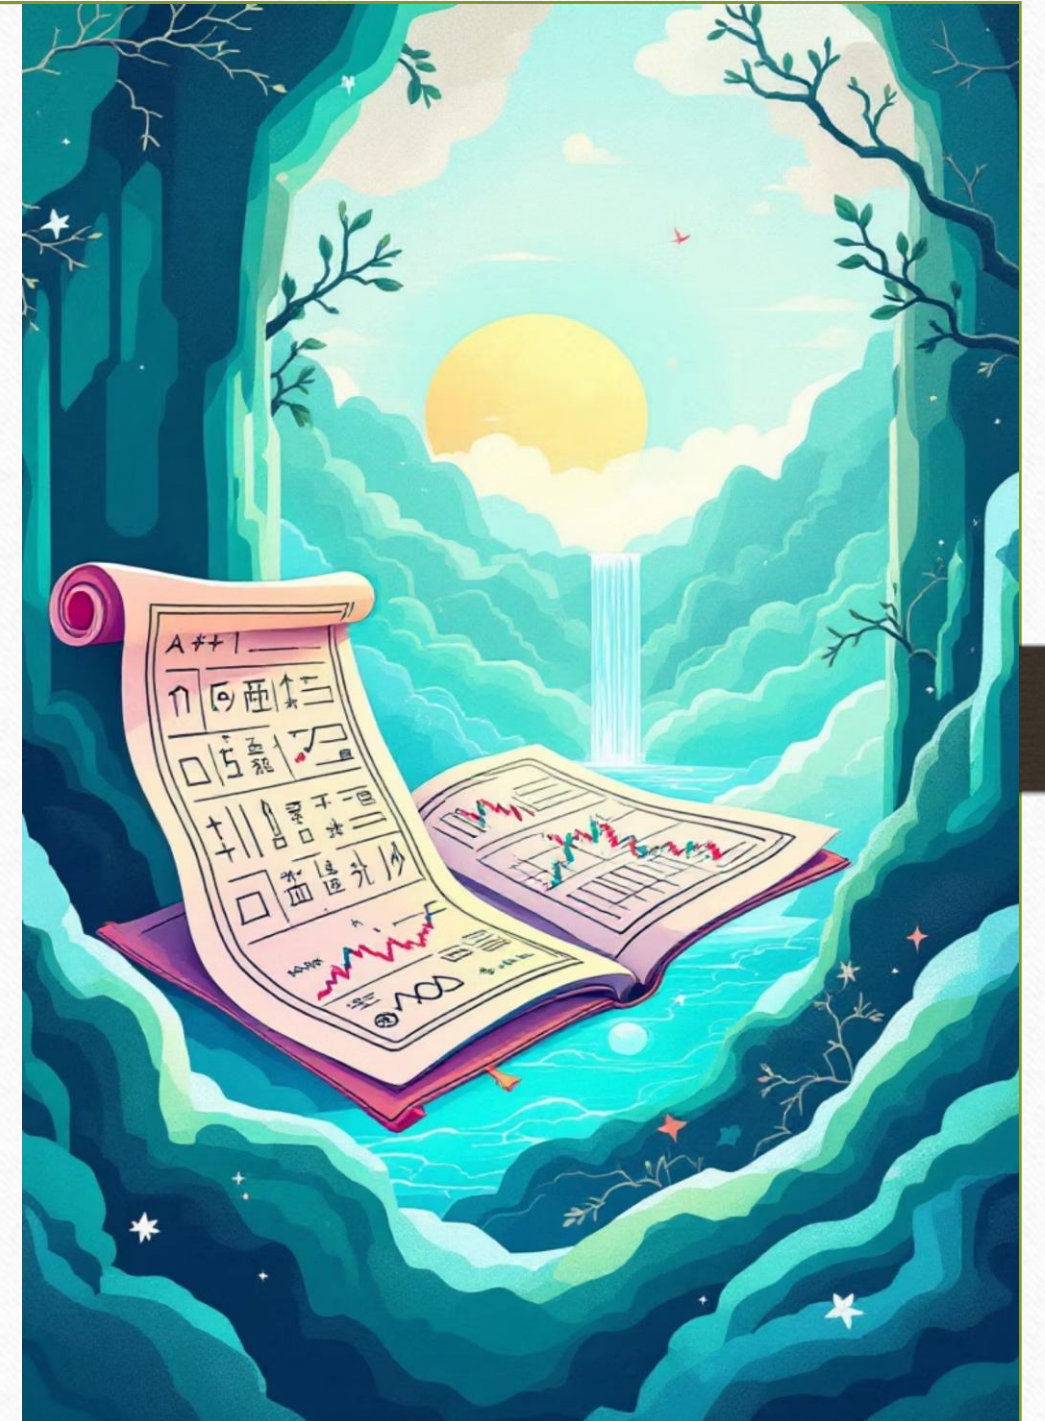

Program Philosophy

- Markets follow structure, rhythm, and proportional balance
- Time and structure define opportunity before price
- Geometry provides reference, not certainty
- Risk management and discipline override all analysis

Intentionally selective, this program is built for traders who value process, preparation, and repeatability over short-term speculation.

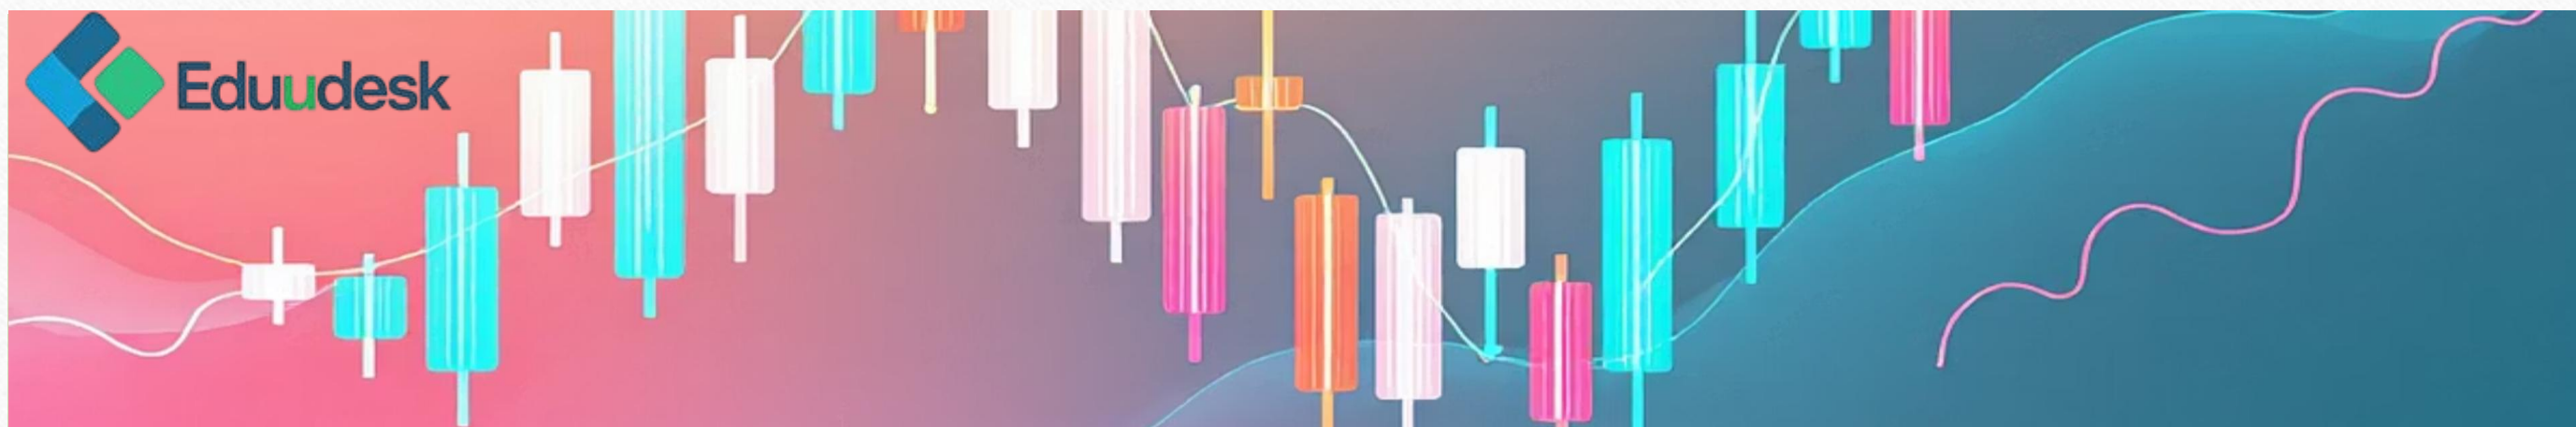

Complete Professional Curriculum

Module 1: Gann Market Foundations

Core Principles

- Natural law, vibration, rhythm, and repetition in markets
- Why time pressure often precedes major market turns
- Difference between speculation and structured analysis

Module 2: Swing Structure & Trend Definition

Swing Identification

Identify major and minor swing highs and lows with precision

Phase Recognition

Understand trend continuation, compression, and exhaustion phases

Entry Timing

Apply structural rules to avoid late-stage entries

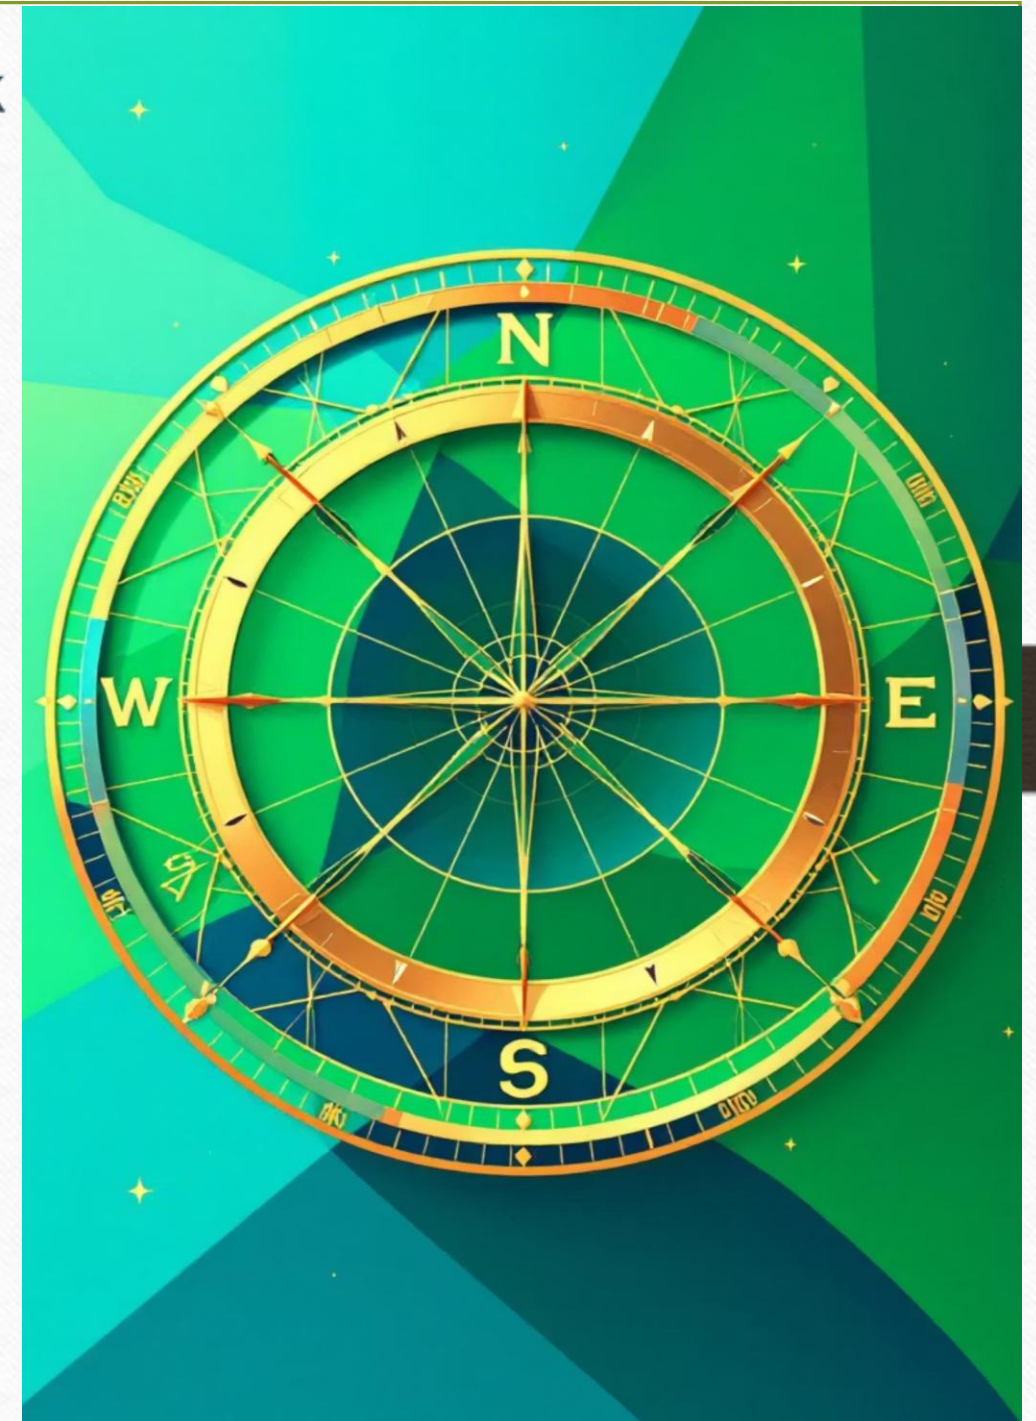

Module 3 & 4: Time-Price & Square of 9

Time–Price Relationship

- Time spent versus price travelled analysis
- Price–time balance, symmetry, and proportionality
- Cycle repetition across instruments and markets

Square of 9 – Price Geometry

- Mathematical logic behind the Square of 9
- Angular relationships: 45° , 90° , 180° , 360°
- Using Square of 9 levels as reference zones

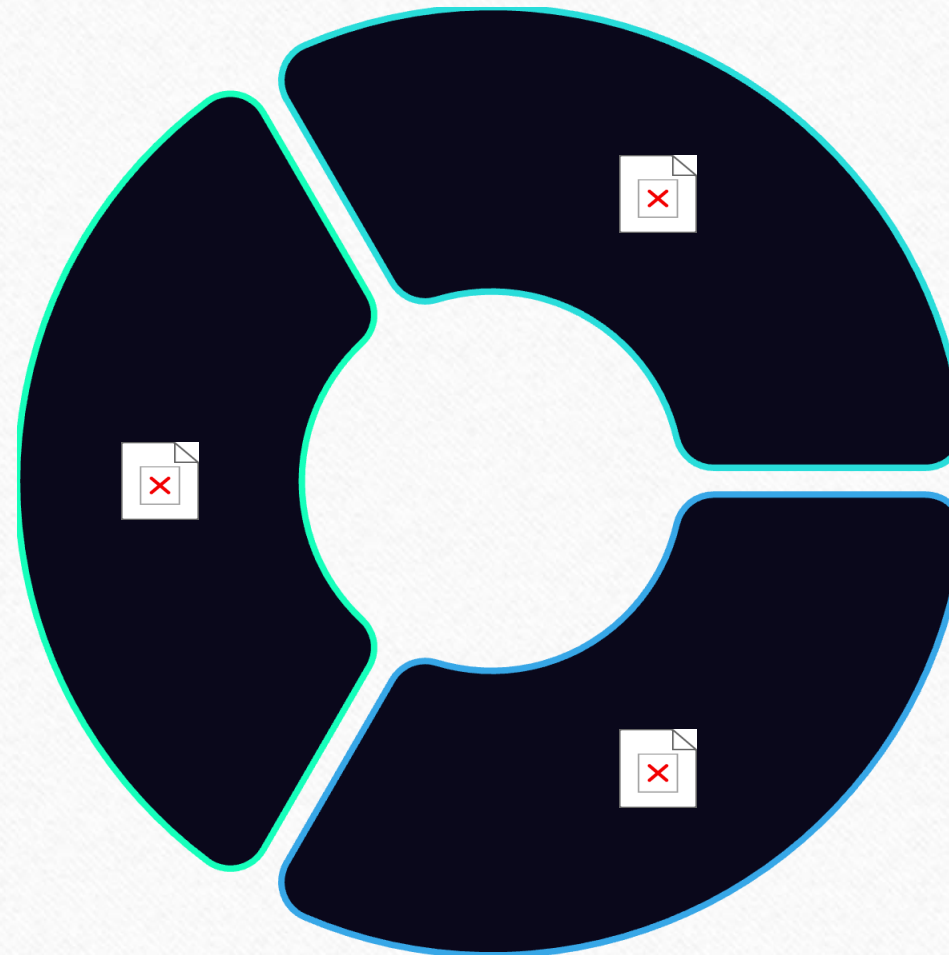

Module 5: Integration & Risk Control

Validation

Confirm geometry through swing structure

Position Sizing

Strategic sizing near geometric levels

Capital Protection

Drawdown control principles

The final module integrates all concepts with emphasis on disciplined execution and capital preservation.

Professional Outcomes

Objective Analysis

Ability to identify high-quality swing structures with clarity and precision

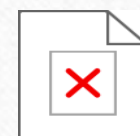

Controlled Geometry

Use price geometry as reference without over-reliance

Market Balance

Clear understanding of market balance and imbalance dynamics

Professional Discipline

Improved discipline, patience, and risk awareness

Market Cycle Stage

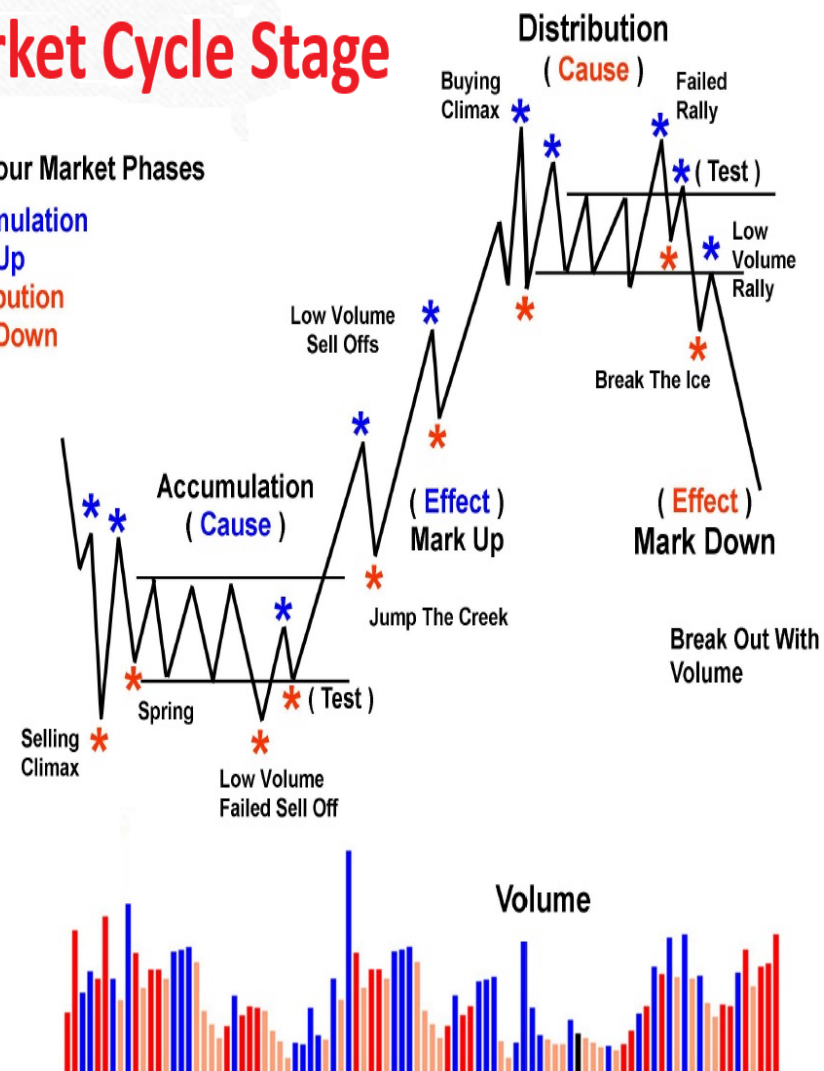

The Four Market Phases

Accumulation

Mark Up

Distribution

Mark Down

A Durable Framework for Market Cycles

This program equips participants with an analytical framework designed to remain relevant across market cycles. The emphasis is on long-term consistency, professional decision-making, and capital preservation.

Move beyond indicators. Master structure, geometry, and time. Build a foundation for sustainable trading success.
